Skills

React.js, React-Native, Expo, MobX, Redux, Codepush, Expo, Context API, Javascript, Typescript, Flow, Node.js, Express.js, Koa.js, Python, Django, Flask, Redis, Java, Spring-boot, Hibernate, Android Studios, IOS, Xcode, VSCode, Sentry, GraphQL, Raspberry-Pi, BASH, Chrome Extension Development, Chrome Developer Protocol, PCI-DSS, Branch.io, Iterable, Mixpanel, Jenkins, Ansible, AWS, and GCP

Work

Line Financial, Remote — Sr. Principal Software Engineer

Oct 2021 - Present

- Spearheaded the Beem app which is a rebranded and rewritten successor of the Line app, by leading the front-end and the mobile team of around 6 developers
- Improved several performance metrics including lower crash rates than peer median, more than 50% app size reduction, and App load under 5 seconds which resulted in the Beem app getting into the top 75 finance apps in the USA.
- Created a web app with 50% feature parity as the mobile app, serving as the first open-loop payment system in America.
- Got promoted from Principal Software Engineer to Sr. Principal Software Engineer.
- Worked on **React-Native + Android + IOS + React.js + Next.js + Tailwind + Node.js + AWS lambda serverless + MongoDB + Git workflows + Code reviews + PCI-DSS compliance + Security Best practices.**

Fareye, Noida — SDE - II

June 2020 - Oct 2021

- Integrated client-side routing library in the native layer by creating RCT-bridge. This reduced the server-side load since the routing will be done in the client whenever all data is available.
- Created Modules that used config-driven UI allowing the app to behave as per client requirements and configuration.
- Managed L3 production support on behalf of the mobile application team.
- Been part of the technical panel for campus hiring from IITs.

UpFluency, Delhi — Co-Founder

January 2020 - June 2020

- Ideated and built a language learning app, exclusively for Hindi Learning.
- Iterated the MVP several times based on the feedback from users.

Stanza Living (full-time employee), Delhi — SDE - I

October 2017 - June 2020

- Built Stanza Living's consumer-facing app, Internal app, Website, CMS for the website, Internal web dashboard to manage operations, IoT-based systems for various operation purposes, systems to manage the IoT devices, And several R&D projects.
- As a result of the above technical initiatives, the company was able to scale to 150+ properties.
- Part of the technical hiring panel for campus hiring from NITs.
- Trained 15+ freshers from top NITs.
- Developed mobile apps, web apps, and IoT systems using **JAVA, Springboot, Node.js, Express.js, MySQL, Python, Django, RaspberryPi, redis, react-native, React.js, MobX and AWS.**

Accenture, Chennai — Associate Software Engineer

March 2015 - March 2017

- Plan, Designed, Developed, and Tested web applications for prepaid card management which was used by clients like Tim Hortons and Starbucks using **Python + Django + HTML + CSS + Javascript**

Notable Freelance Work

Google (short-term contract), Remote —Paid Opensource Contributor

Dec 2023 - March 2024

- Improved Privacy Sandbox Chrome Extension performance using worker threads to offload CPU-intensive tasks.
- Research and implement features to find depreciated library usage in the test application.
- The tech stack used included React.js, CDP protocol, Chrome **extension development, and context API**.

Brototype (Freelance) – Content Creator

- Content Research and Delivery
